NORDIC CONFERENCE 2020

Infants and Preschool Children with Visual Impairment - Prepared and equipped for transitions

Where: Scandic Sluseholmen, Molestien 11, 2450 Copenhagen SV. When: May 14th -15th 2020

.....

Synscenter Refsnæs is responsible for planning and hosting the Nordic Conference in Copenhagen. The conference is open to all and is presented in collaboration with NOVIR - Nordic Visual Impairment Network.

Infants and preschool children includes:

- Infants age 0-2
- Toddlers age 2-4
- Preschoolers age 4-6
- Children with visual impairment and multiple disabilities (MDVI) age 0 -?

The conference focuses on sharing best practices, experiences and results from research through oral presentations, poster presentations, workshops and other activities.

Once again, we bring together visual impairment specialists, service providers, other professionals and parents with interest in sharing knowledge and best practice in relation to infants and preschool children with visual impairment.

Practitioners, specialists, lecturers at educational programs and researchers are invited to share their best practices, experiences and results from research. We kindly ask you to fill out the form in the attachment. Please note that the presenter of the abstract must register for the conference.

The theme of the conference is:

Prepared and equipped for transition

Key words: Early intervention, development, learning and well-being of children with visual impairment. The conference focuses on theory, methods, approaches, services and good practice in relation to the current learning agenda for preschool children in the Nordic region. How can we support and create an inclusive foundation for preschool children into a successful transition and participation from family to daycare and from daycare to school?

Call for abstracts

We call for abstracts on the following topics:

- Pedagogical educational curriculum: What is the current learning agenda in the area of preschool children in the Nordic countries? How do we meet this agenda in our consultation for children with visual impairment, their family, other professionals and institutions?
- Foundations in our current views on children with impairments
- Inclusion in children's communities
- Good practice for interdisciplinary coordination and organization around child, family and institutions. How to ensure a coherent habilitation/rehabilitation effort?
- Quality of Life (QoL) for children with visual impairment – how to examine and interpret QoL among children with impairments
- Early childhood intervention: Vulnerability and prevention
- Identifying and managing psychological and physical health needs
- Emotion, behavior and psychosocial adjustment
- Interaction, communication and self-understanding

Abstracts

Send your contribution to: scr-viden@regionsjaelland.dk

Submission deadline: December 15th 2019

Use the attached abstract submission form.

Registration

At the end of 2019 information about registration, fee etc. is distributed to contributors, NOVIR partners and other networks.
